

CCPC TRAVEL RESEARCH

May 2021

OBJECTIVES & METHODOLOGY

The main objective of this research is to measure holiday planning in Ireland and abroad during the Covid-19 pandemic.

- This research was carried out using Omnipoll, Ipsos MRBI's telephone omnibus service. Omnipoll interviews a fresh, nationally representative sample of 1,000 adults aged 15+, every fortnight.
- The sampling approach used is RDD (random digit dialling) to ensure that both listed and unlisted phone numbers have the same probability of being contacted. Interviews are conducted with respondents via landlines and mobile phones.
- The sample size achieved on Omnipoll is robust at 1,000 respondents – approximate margin of error of +/-3%
- Fieldwork was conducted between 30th April – 11th May 2021.
